CONFIDENTIAL - DO NOT DISSEMINATE

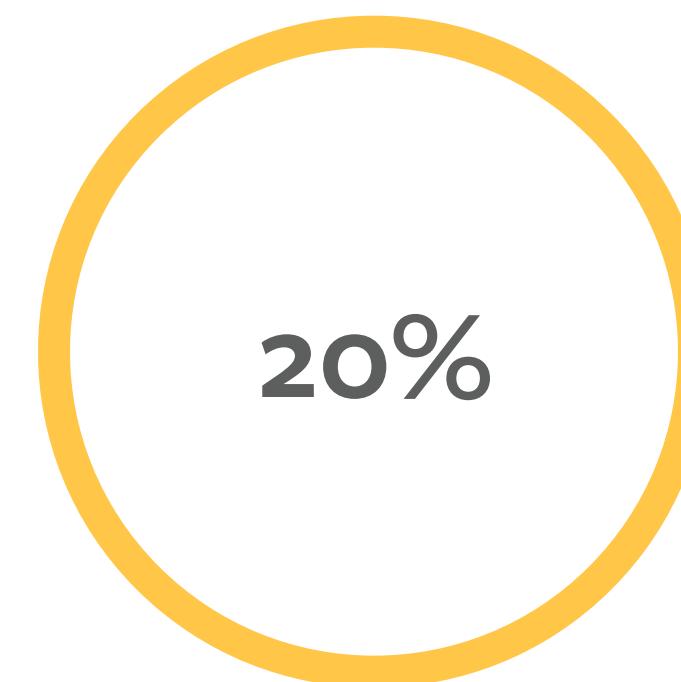

Our Financials

What we're seeking

Seed Round

This will enable the completion of our product and position us to achieve profitability

Preferred Equity

This equity, priced at \$49 per unit has a 1x preference, fully participating in a liquidity event

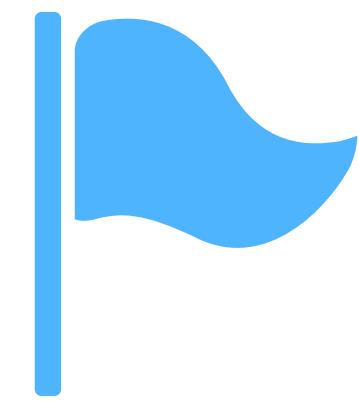

Pre-money Valuation

Based on \$1M Angel investment, our product, the market opportunity, and our team

Our Company

Credntia: Your Identity Wherever You Are

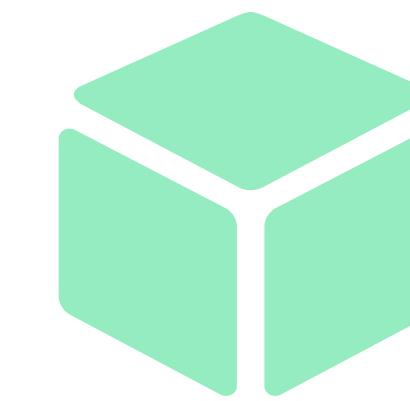

Our Founding

Credntia was founded in January 2014 with a vision to change the way we interact with identity

Our Mission

Our company's core mission is to enable everyone to take control of their identity

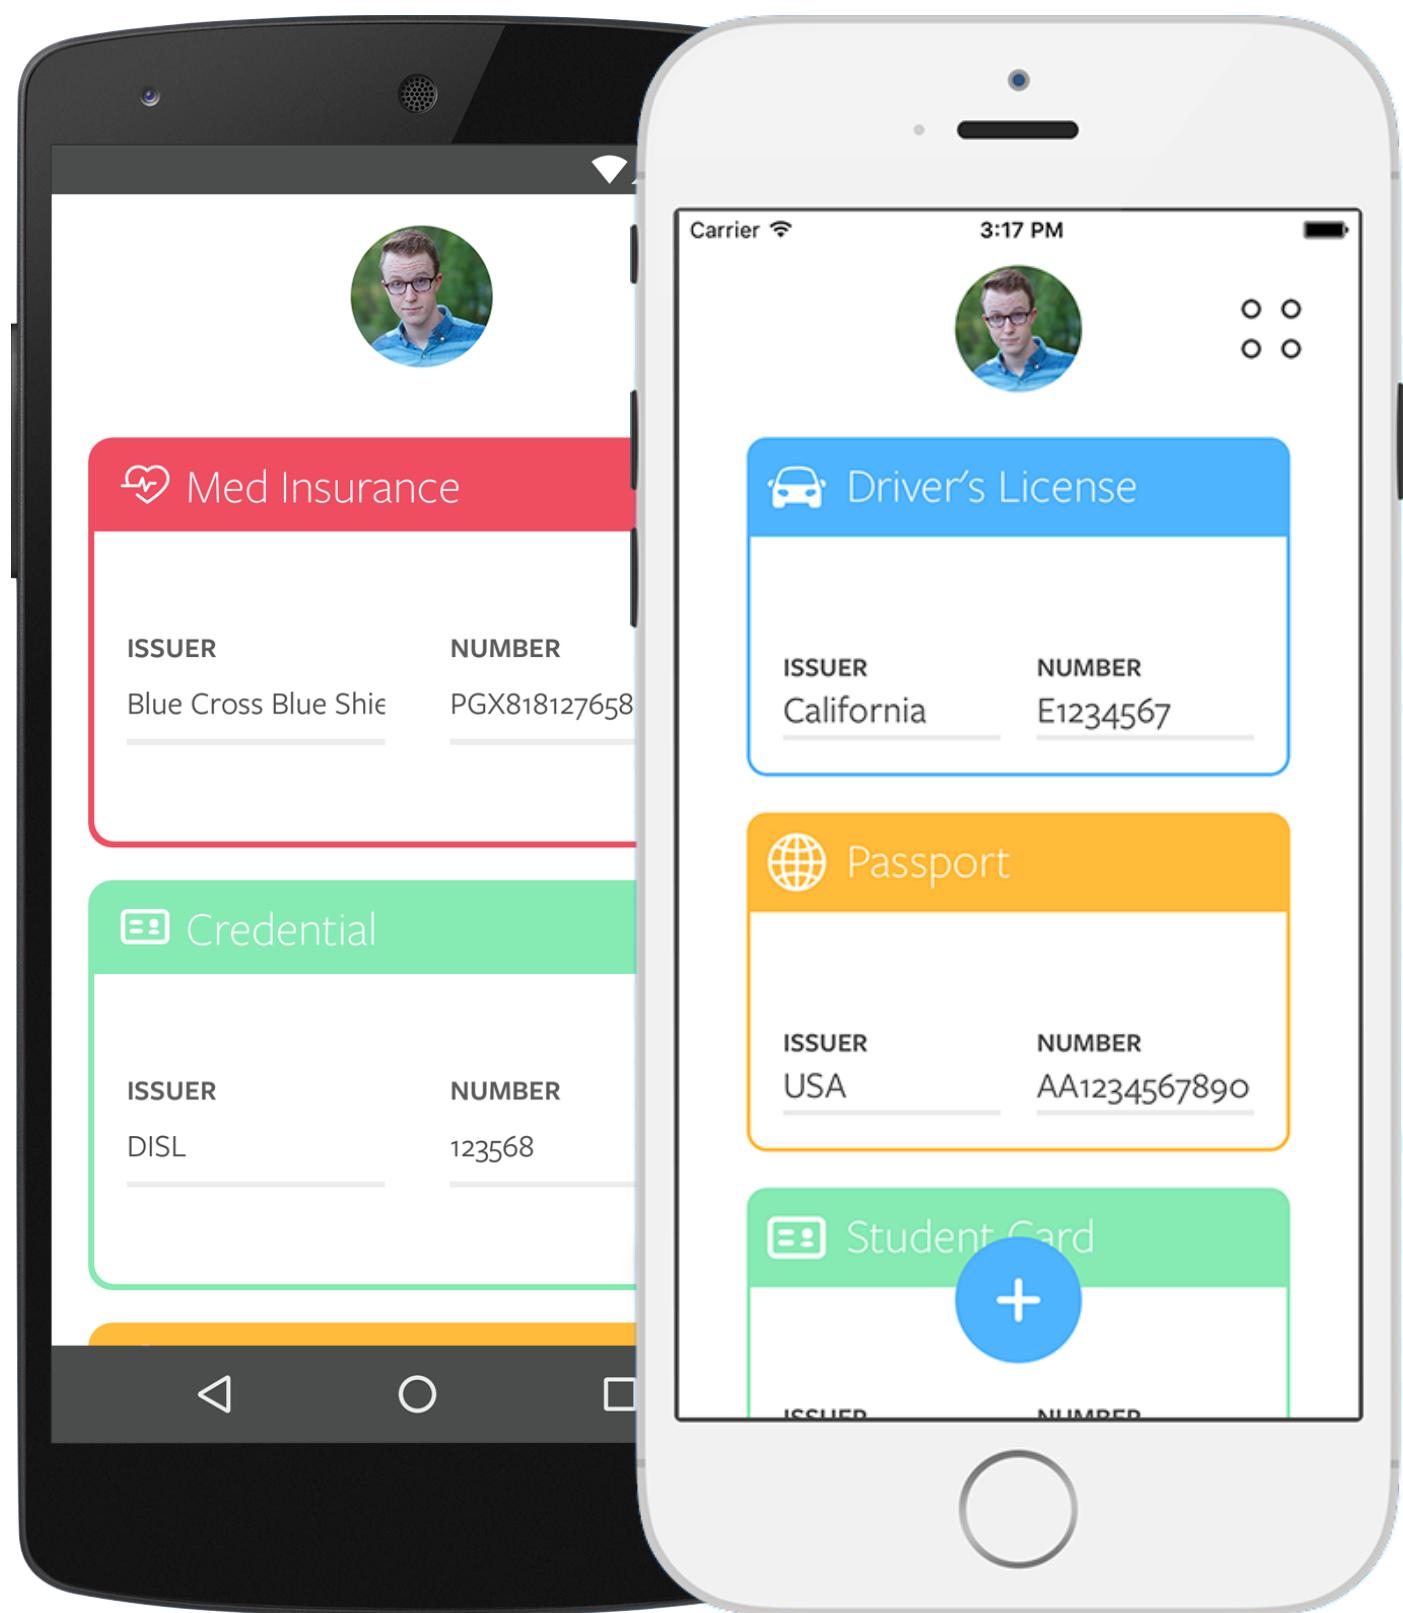

Our Product

We've been in research and development, creating our identity product offering

Our Applications

iOS and Android apps available to consumers

Users: 3,000 users to-date

Platforms: Available on both iOS & Android

Ratings: 4+ star since launch

Features: Store personal credentials, like your driver's license and passport, and sync your credentials across all your devices

The Problem

Management of identity and access is broken

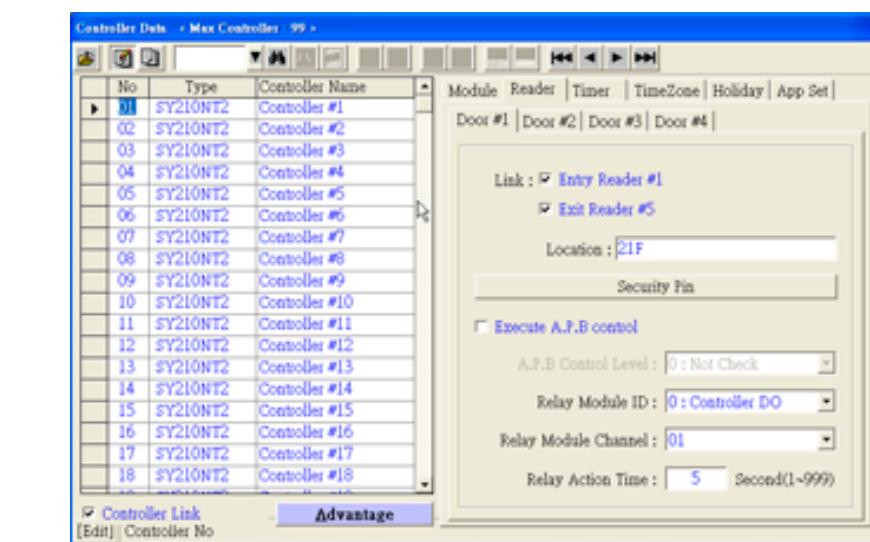

Management

Key cards and fobs are hard to track, are easily lost or stolen, and are an HR nightmare

Security

Using a \$16 RFID duplicator, anyone can duplicate key cards and fobs to any building access

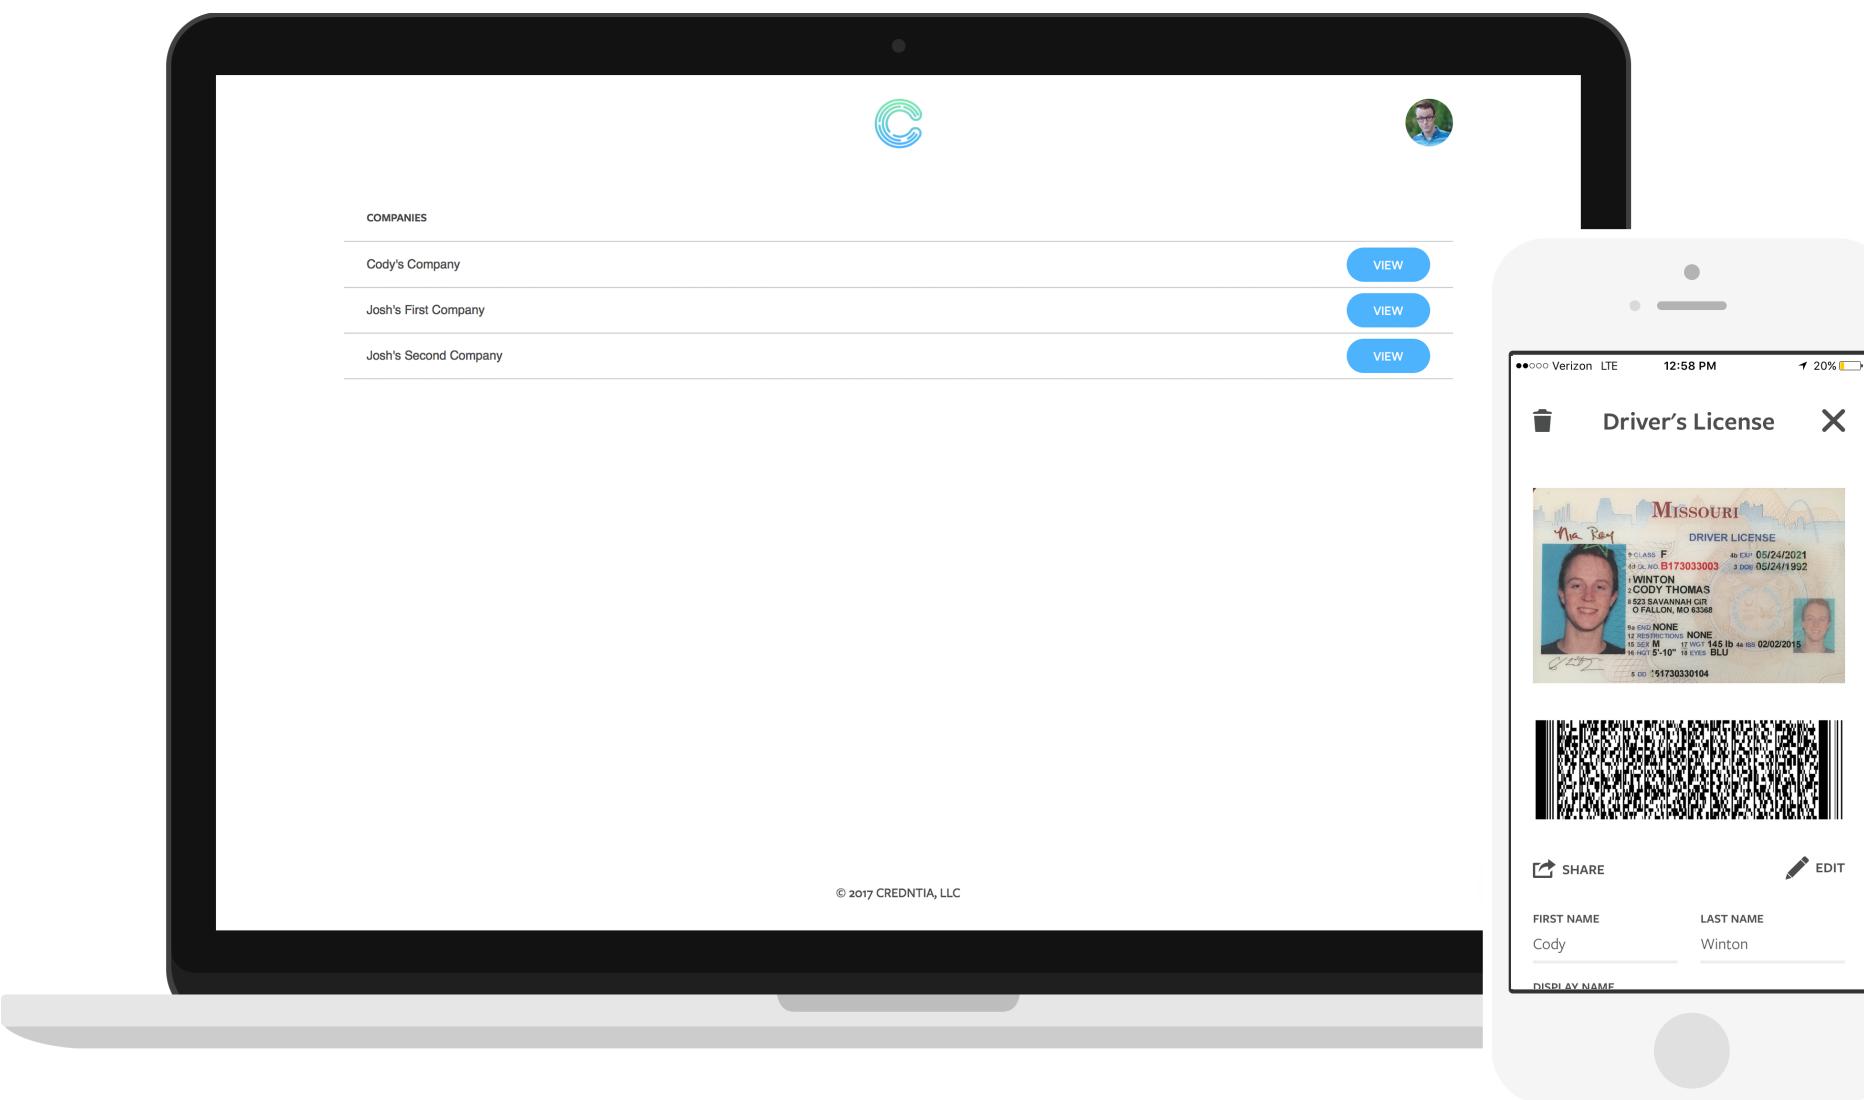

Technology

Current access control systems rely on archaic, unintuitive tech, making access control a hassle

Our Solution

The Credntia Platform

Our platform is **simple**, enabling easy management of access control

Our platform is **secure**, giving peace of mind to managers and employees alike

Our platform is **effective**, making access control work the way it always should have

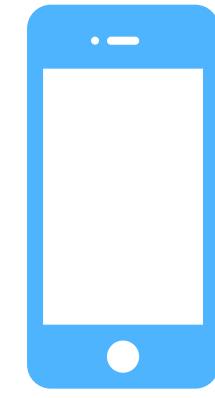

How It Works

Access control done right

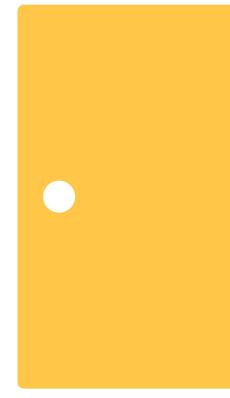

Cloud Access

Using our web portal, managers can securely grant facility access to employees and guests

Mobile Credentials

Employees or guests use our app to easily download and store their access credentials

Door Reader

Employees use Bluetooth or NFC on their mobile devices to gain access at the door reader

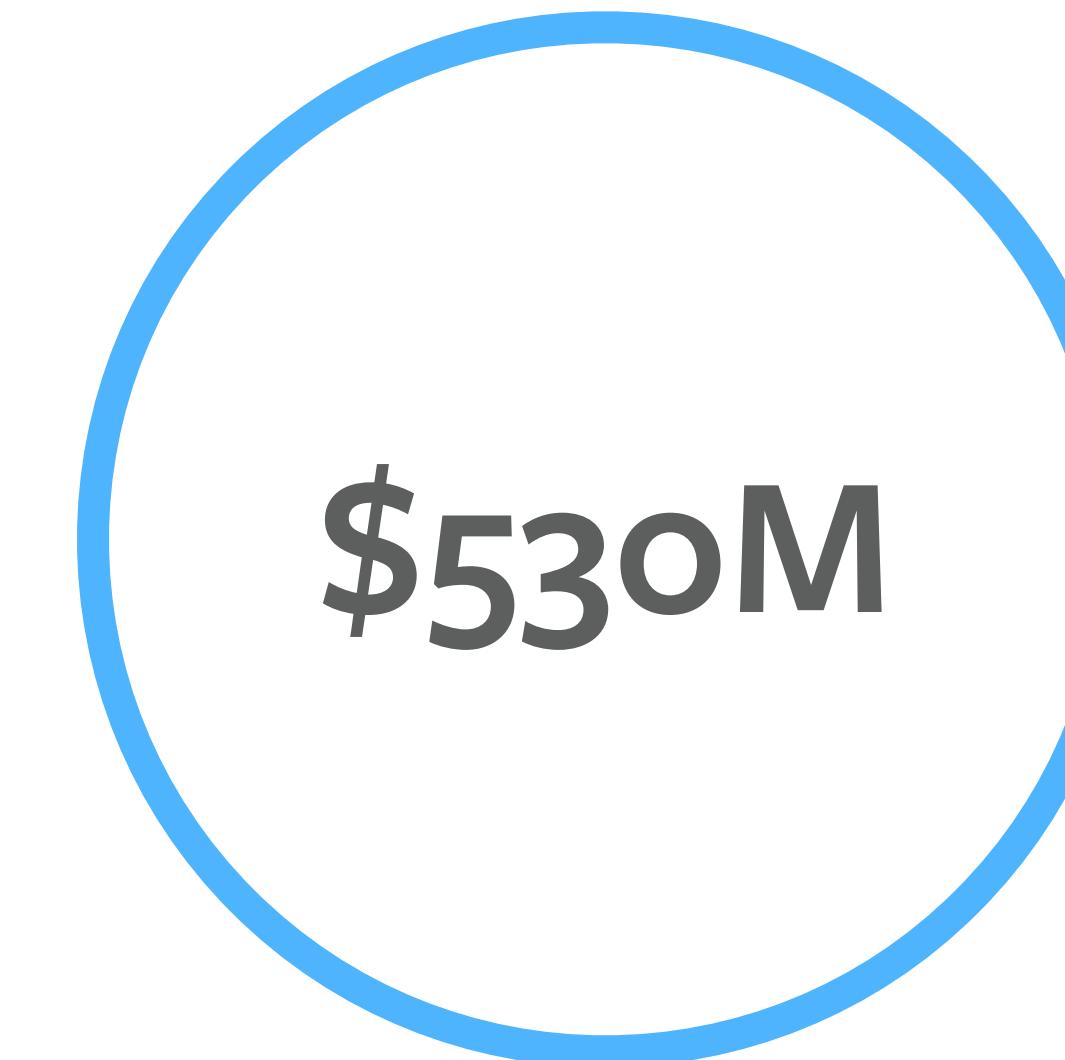

The Market Size

Our place in the market

Total Addressable Market

Electronic Access Control Systems (EACS) market worth \$16.3 Billion 2017 - Source: [Markets and Markets](#)

Serviceable Addressable Market

Access Control as a Service (ACaaS) market worth \$530 Million 2018, \$1.8 Billion 2025 - Source: [HID Global](#)

Serviceable Obtainable Market

20% of Addressable Market - Tech-forward, small to medium sized businesses with ACaaS requirements

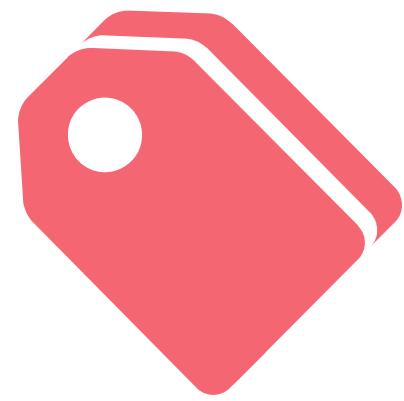

Our Business Model

How we make money

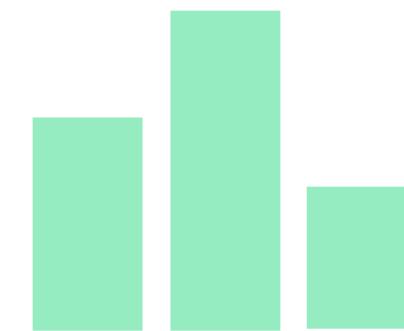

Subscription Tier

For companies needing access for under 1,000 users, we will charge **\$2.50 per user/mo**

Enterprise Tier

For companies needing access for under 10,000 users, we will charge **\$1.25 per user/mo**

Custom Tier

For companies needing access for over 10,000 users, we will create **custom contracts**
